FORCEPOINT

FORCEPOINT NGFW 100 SERIES

Enterprise SD-WAN connectivity and security for stores and branch offices

SD-WAN connectivity and security for connecting and protecting stores, branches or home offices with true enterprise efficiency, availability and security. The 100 Series combines 10 Ethernet ports (optionally more on the NGFW 115) and optional WLAN (on the NGFW 115) in a compact desktop form that's easy to deploy without an on-site technician.

Forcepoint NGFW provides multiple layers of security. It has built-in IPS with anti-evasion defenses, accelerated encrypted inspection, file scanning, exploit detection and more. Forcepoint's cloud-assisted Advanced Malware Detection (sandboxing) and dynamic URL Filtering can be enabled in moments. Forcepoint's CASB, Web, Email and DLP Security serve as ideal complements for the ultimate level of protection.

NGFW 115

All Forcepoint NGFW systems are administered via the Forcepoint NGFW Security Management Center (SMC). It provides centralized provisioning, rapid configuration and holistic monitoring of up to 2,000 devices in even the most distributed enterprise. SMC's high-level "Smart Policies" map business processes into security controls faster and more accurately than low-level firewall rules and enable changes to be made throughout the network in minutes. Fully customizable, interactive visualizations give administrators continuous 360° visibility to quickly identify and resolve incidents.
